

30 May 2022

Dear Parents,

In Science, Year 1 is learning about forces. As part of our program the students will have the opportunity to design, plan and make a piece of playground equipment. Students will identify the type of force that is applied to make the equipment move. To do so we kindly request students to bring in recycled materials required to make their playground equipment by Friday **10 June**. We encourage you to discuss the type of equipment they would like to make and what force they need to apply to it.

**Materials can include:** paper towel rolls, cardboard boxes, shoe boxes and recycled plastic bottles or lids.

Kind regards,  
Year 1 Teachers
